

Segersjö International Horse Trials with European Cup 2023

Segersjö will organize the European Cup (EC) on 22-27 August 2023.

EC is a team competition in CCI3*-S. Each country can be represented by teams with 4-6 riders. It is also an individual competition where countries not represented by teams can participate with up to 3 individual riders. Countries represented by a team of 6 may also bring an additional 2 riders who compete as individuals.

In 2023 we will also arrange a long CCI2*-L class which gives the riders the opportunity to bring additional horses.

EC runs in CCI3*-S. The difference compared to a regular competition is that the teams ride a quadrille. How this is to be ridden and how the result is calculated can be seen in this You Tube video of the team test: <https://www.youtube.com/watch?v=vq69ivJ2oIY>

This form of competition has a long tradition and is highly valued on the continent and in England. We in Sweden also have a long tradition of the competition and EC has been arranged in Sweden on several occasions.

EC is a competition with many activities in addition to riding during the competition days. The teams are followed by a large crowd of supporters and the mood is high! Not least during the show competition where each country presents their own show number. Of course, there will also be a riders party. We will present a full program in the spring of 2023.

The competition is an excellent opportunity for the team members to gain experience of competing as a team. Not least the quadrille contributes to this by building team spirit during training for it.

Segersjö has arranged international 2* and 3* competitions for many years. The European Championship for juniors and young riders has been held twice. Our policy is to work with leading international officials, and over the years, many well-known names in the eventing world have become involved in our competition. We therefore feel that we can offer participating teams a competition with a high international level and a friendly atmosphere.

We are looking forward to welcoming teams from your country to Sweden and the European Cup 2023.
